

EMILY MARKOWITZ

I believe there is a need and new opportunity across all science fields to make workflows more efficient, improve data management, and make our results accessible and digestible to general audiences.

EDUCATION

2015
|
2018

- **Accelerated Master's of Science in Marine Science**
Dr. Janet Nye, Quantitative Fisheries Ecology Laboratory
 Stony Brook University, NY
 - Thesis: "Distribution Shifts Associated with Changing Environmental Parameters in Two Demersal Species: Summer Flounder (*Paralichthys dentatus*) & Black Sea Bass (*Centropristes striata*) on the NE US shelf."
 - Developed environmental preference and habitat suitability models from the NOAA NEFSC survey dataset and Regional Oceanographic Modeling System (ROMS) output in MATLAB and R.
- **Bachelor of Science in Marine Science, Cum Laude**
Minors in Geospatial Information Sciences, Coastal Environmental Studies, and Theater Arts
 Stony Brook University, NY
 - Crew member aboard the university research vessel, the *R/V Seawolf*
 - Dr. Joseph Warren, Acoustic Laboratory for Ecological Studies
 - Dr. Bradley Peterson, Marine Community Ecology Laboratory, School of Marine and Atmospheric Sciences, Stony Brook, NY
 - Dr. Steve Wing, University of Otago, Portobello Marine Laboratory, New Zealand
 - Dr. Nathan Brennan, Mote Marine Laboratory Marine Aquaculture Park, Sarasota, FL
 - Dr. Janet Nye, Quantitative Fisheries Ecology Laboratory, School of Marine and Atmospheric Sciences, Stony Brook, NY

LANGUAGE SKILLS

Last updated on June 20, 2023.

WORK EXPERIENCE

2020
|
Present

● **Research Fisheries Biologist**

NOAA Fisheries' Alaska Fisheries Science Center, Resource Assessment and Conservation Engineering Division, Groundfish Assessment Program

 Seattle, WA

- Assist in planning of and participate aboard the Eastern Bering Sea Shelf Bottom Trawl Survey, Eastern Bering Sea Slope, and Arctic Bottom Trawl Surveys.
- Assist in data collection and pre- and post-cruise data management for surveys and field research activities.
- Advance species distribution modeling research using model-based estimates of abundance and biomass using VAST, Generalized Additive Mixed Models (GAMMs), and other techniques.
- Aid in the development of R products that advance GAP surveys, modeling activities, and automation of reports and data products.
- Assist with the production of educational and informational outreach materials for engaging Alaska native communities about the Bering Sea surveys.

Links: [Post](#), [More info](#)

2019
|
2020

● **Environmental Policy Analyst**

NOAA Fisheries' Office of Science and Technology, Division of Economics and Social Analysis, Contractor through ECS Federal

 Silver Spring, MD

- Manage the production and publishing of the annual Fisheries Economics of the US Report (FEUS).
- Redevelop a commercial, recreation, and aquaculture national I/O model impact calculator model as an RShiny application to assist fisheries scientists and managers assess the impacts of changing fisheries.
- Develop the national fisheries economic productivity Tornqvist index output and organizing two fisheries economic productivity workshops for NOAA scientists.

Links: [Fisheries Economics of the US Report](#), [GitHub Repository](#)

2018
|
2019

- **2018 Knauss Marine Policy Fellow**

NOAA Fisheries' Office of Science and Technology, Assessment and Monitoring Division, Protected Species Science Branch, Fellow through New York Sea Grant

📍 Silver Spring, MD

- Lead Coordinator, Protected Species Assessment Workshop II (PSAW II/#PSAW2019). 150+ person event, La Jolla, CA February 2019.
- Lead Coordinator, National Protected Species Toolbox Initiative (NPST). Managing 7 individual projects from fisheries science centers around the country.
- Co-Lead Coordinator, 2018 Protected Species Toolbox Mini-Symposium II. Program Manager, Sea Turtle Assessment Internal Funding Allocation.
- Lead Coordinator, Sea Turtle Research Standard Methods. Technical Support, Sea Turtle & Marine Mammal Protected Species Climate Vulnerability Assessment.
- Prepared sensitivity attributes guidelines, webinar presentations, and population literature reviews.
- Editor, Science Connect Newsletter (via Constant Contact and GovDelivery)
- RShiny App Developer, NMFS' Technical Guidance for Assessing the Effects of Anthropogenic Sound on Marine Mammal Hearing. App provides a calculator function and report for permit applications. Prepared working group/program terms of references, webpages, internal proposals, and final reports.

Links: [PSAW II Planning Website](#), [Science Connect Newsletter](#)

❖ RESEARCH

2022

- **{sdmgamindex}: R package for calculating survey indices by age with generalized additive models**

In [development](#): R package for calculating survey indices by age from DATRAS exchange data using Generalized Additive Models.

2021
|
on

- **Model-Based Abundance and Distribution Estimates using VAST**

Help provide mostly-VAST [model-based-estimates](#) of abundance, distribution, or age composition from AFSC Groundfish Assessment Program (GAP) bottom trawl survey data to stock assessment authors.

2021

- **Alaska Fisheries Science Center Survey Data Reports**

Reproductively automate groundfish data reports for all surveys conducted by the AFSC in R Markdown. View the [GitHub Repository](#) for this code.

2021

- **Northern Bering Sea Groundfish and Crab Trawl Survey Community Highlights**

Reproducibly automate outreach reports for the Bering strait communities with results from the northern Bering sea survey conducted by the AFSC in R Markdown. View the [GitHub Repository](#) for this code.

2021

- **Fisheries Economics of the US Report**

Manage the redevelopment and production of the [Fisheries Economics of the US report](#). This is a national-level report that provides ten years of economic information, impacts, and analyses related to U.S. commercial and recreational fishing activities and fishing-related industries. I am working to contemporize this iconic report by writing reproducible code using R and RMarkdown, which produces several report outputs and JavaScript files for the interactive FEUS online tool. All of this work has gone into improving this nationally regarded report for the many who reference it and making the process of producing it more streamlined, reproducible, and efficient.

2021

- **AFSC RACE Groundfish and Shellfish Survey Public Data**

This dataset includes zero-filled (presence and absence) observations and catch-per-unit-effort (CPUE) estimates for all identified species at for index stations by the Resource Assessment and Conservation Engineering Division (RACE) Groundfish Assessment Program (GAP) of the Alaska Fisheries Science Center (AFSC). There are no legal restrictions on access to the data. The data from this dataset are shared on the [Fisheries One Stop Stop \(FOSS\) platform](#). These scripts can be found on [GitHub](#). For more information about codes used in the tables, please refer to the [survey code books](#).

2021

- **GAP Survey Temperature Maps**

These scripts ([GitHub Repository](#)) create the daily temperature and anomaly plots as NOAA Fisheries' Alaska Fisheries Science Center conducts fisheries independent surveys in Alaska. The scripts pull temperature content from google drive and then push the maps to google drive and our internal communications FTP server for the communications team to post on our [website](#).

2021

- **AFSC RACE GAP Survey App**

This [GitHub Repository](#) uses a google spreadsheet listing content to build a consistent, reproducible, and reliable local resource [website](#) for our boats while boats are out to sea.

2020

- **{FishEconProdOutput}: Measuring Output for U.S. Commercial Fisheries From Theory to Practice**

This [package](#) provides guidelines on fishery productivity measurement at the individual fishery and aggregate sector levels. Attention is given to the constructions of output and total factor productivity based on available data and a bottom-up approach. Given that there is no nation-wide standard cost survey, we recommend starting with measuring TFP at the fishery level based on a translog gross output production possibility frontier using index number techniques. Special attention is given to measuring quality-adjusted physical capital inputs in the bottom-up approach.

2020

- **{GAPsurvey}: At-sea data management tools for RACE GAP surveys**

[Tools](#) for working with at-sea survey data for AFSC's Groundfish Assessment Programs surveys.

2019

- **NOAA Fisheries Commerical, Recreational, and Aquaculture Fisheries Economic Impact R Shiny Model**

I/O models are used to assess economic activity such as jobs, income, and sales generated by a given industry sector. This is currently used in industry statistics (such as in FEUS) and management applications (to determine how a change would affect the economy, such as in planning team meetings). The [R Package GitHub Repository](#) feeds the [R Shiny App](#).

2018

- **Modeling Environmentally Driven Distribution Shifts for Two Demersal, Migratory Species**

Habitat suitability models (HSMs) of summer flounder (*Paralichthys dentatus*) and black sea bass (*Centropristes striata*) were created using the fishery-independent Northeast Fisheries Science Center (NEFSC) bottom trawl survey data in generalized additive models and cumulative distribution functions. These analyses were used to probabilistically link where different length classes of these fish would likely be across different environmental variables in spring and fall. These different environmental variables (surface and bottom temperature and salinity, depth, and bottom type) have similar influences on life history of these two demersal, migratory, and commercially important species. Then, the HSMs were used to illustrate how the population's distribution changed over time by hindcasting over regional ocean modeling systems (ROMS). The ROMS used in this analysis was a 1 Day Averaged ROMS for the Northeast US Coastline from 1958-2020. Learn more on our [lab website](#).

2018

- **NOAA Fisheries Marine Mammal Acoustic Thresholds**

NMFS has provided this [guidance](#) and [R Shiny Web Calculator](#) as an optional tool to provide estimated effect distances (i.e., isopleths) where PTS onset thresholds may be exceeded. Results provided by this calculator do not represent the entirety of the comprehensive effects analysis, but rather serve as one tool to help evaluate the effects of a proposed action on marine mammal hearing and make findings required by NOAA's various statutes. Input values are the responsibility of the individual user. Code for this tool is available in this ([GitHub Repository](#)).

TEACHING EXPERIENCE

2023

- **Automated Scientific Reporting in R: Basics to Production**

Markowitz, EH

- 2023 UMass Dartmouth QuantFish Seminar Workshop

Links: [Recording](#), [GitHub Repo](#)

2022

- **Co-teacher and co-organizer for conference short GitHub course**

2022 Women in Statistics and Data Science Conference

 St. Louis, MO

- Git-ting It Together: Learn to Use Git and GitHub for Your Projects
- Co-taught and co-organized with Eli Holmes
- [Short course description](#)
- [GitHub Repository](#)

2021

- **Co-teacher and Co-organizer**

NOAA Fisheries Alaska Fisheries Science Center

 Seattle, WA

- Co-host and organize a 5-week entry-level R-Users workshop for 15 coworkers in the AFSC RACE groundfish assessment program.
- Developed a curriculum, lesson plans, and assignments.
- [Lesson Website](#)

2020

- **Co-teacher and Co-organizer**

NOAA Fisheries Office of Science and Technology Division of Economics and Social Analysis

 Silver Spring, MD

- Co-hosted a Workshop for Social Scientists for over 60 participants from across the country and across centers
- [Lesson Website](#)

We can take it upon ourselves to build an inclusive community for teams to collaborate with and learn from. Internally-driven investment in professional development extends the impact of a team member and takes the weight off the organization's experts as new users are able to take on more tasks.

2015

- **ArcGIS Teaching Assistant**

Sustainability Studies Program, Stony Brook University

📍 Stony Brook, NY

- Introduction to ArcGIS, taught by Professor Maria Brown.
- Worked with students to develop multi-map projects aimed at answering questions in hydrology, weather, climate change, and marine science for unique final projects in ArcGIS.
- Provided comments and assessments of presentations, quizzes, and homework assignments.
- Held office hours and provided computer assistance.

OPEN SCIENCE

2023

| Present

- **National Openscapes Mentor Group for NOAA Fisheries**

NOAA Fisheries Alaska Fisheries Science Center

📍 Seattle, WA

- Working to support a national-level, 3-year cohort with mentors across NOAA Fisheries and Openscapes.
- [Openscapes Website](#)
- [AFSC-Openscapes Landing Page](#)
- [nmfs-opensci GitHub Organization](#)

2022

- **Co-organizer and co-host for the Fall 2022 AFSC Openscapes Workshop**

NOAA Fisheries Alaska Fisheries Science Center

📍 Seattle, WA

- Openscapes training for the center was funded for a second round with Megsie Siple and Josh London.
- [AFSC News Article: Making Inroads to Open Science](#)
- [AFSC Website Cohort Digest](#)
- [Openscapes: AFSC Blog Digest Post](#)
- [Openscapes Nation-Wide Cohort Blog Post](#)

2022

- **Co-organizer and co-host for the Winter 2022 AFSC Openscapes Workshop**

NOAA Fisheries Alaska Fisheries Science Center

📍 Seattle, WA

- Co-wrote a proposal to bring the inaugural Openscapes training workshops to AFSC with Megsie Siple and Josh London
- [AFSC Website Cohort Digest](#)
- [nmfs-opensci Workshop Digest](#)
- [Openscapes: AFSC Blog Digest Post](#)

2021

| Present

- **Co-organizer of the NMFS-wide R Users Group and GitHub Organization**

NOAA Fisheries Alaska Fisheries Science Center

📍 Seattle, WA

- Organize meetings and speakers and foster the open science-R community across NMFS.
- [NMFS-R-UG GitHub Organization](#)
- [nmfs-opensci GitHub Organization](#)

MENTORSHIP

2020
|
2021

- **Capstone Co-mentor**
University of Washington School on the Environment Undergraduate Capstone Program  Seattle, WA
 - Mentoring student investigating the purple-orange sea star and bivalve climate change-driven distribution changes in Alaska's eastern Bering Sea.
- **High School STEM Competition Mentor and Volunteer**
Blacks in Government  Silver Spring, MD
 - Mentor to student participant and assisted with marketing for the NOAA Chapter High School STEM Competition.
- **Graduate Peer Mentor**
School of Marine and Atmospheric Sciences, Stony Brook University  Stony Brook, NY
 - Helped troubleshoot seabird telemetry home range metrics and marine mammal bycatch modeling
- **High School Student Mentor**
Dr. Janet Nye, Quantitative Fisheries Ecology Laboratory, Stony Brook University  Stony Brook, NY
 - Mentored high school student assisting on assessment of Black Sea Bass (*Centropristes striata*) winter survival on the NE US shelf using MATLAB

OUTREACH

2022

- **What does a Fisheries Researcher Do?**
Markowitz, EH
 - NOAA Live! Alaska Seminar SeriesLinks: [Recording](#), [NOAA Live! Alaska](#)

2021

- **Counting Fish in Alaska!**
Diversity in STEM - Let's Talk Science Symposium  McGill University, Montreal, Quebec, Canada/Remote
 - Presented to students in grades 3-8 from across Montreal, Quebec, Canada about NOAA Fisheries groundfish surveys in Alaska.

2018
|
Present

- **Skype and Scientist Visiting Scientist**
Remote  Skype a Scientist Program
 - 30+ schools across the country K-12

- 2018 ● **Science Festival Booth Presenter**
 USA Science and Engineering Festival Washington, D.C.
 • Used the Science on Sphere (SOS) to share relationships between temperature, climate change, and changes in fish distributions.
- 2018 ● **Presenter**
 Smithsonian National Museum of Natural History's Expert in Program Washington, D.C.
 • Hosted a table in the Smithsonian Natural History Museum Ocean Hall and engage with patrons about fisheries management.
- 2016 | 2017 ● **WISE Program Assisting Researcher**
 School of Marine and Atmospheric Sciences, Stony Brook University Stony Brook, NY
 • Stony Brook WISE (Women in Science and Engineering) working up some of the day's data from our mini-study on blue crab temperature-dependent aerobic and anaerobic metabolism.
- 2014 ● **Plastic Pollution Outreach Program Organizer**
 Coastal Steward Long Island Across Long Island, NY
 • Wrote, designed, and ran an outreach initiative teaching local elementary and middle school students about the global marine plastic pollution problem with Coastal Steward

PUBLICATIONS

- In review ● **Advancing bioenergetics-based modeling will improve climate change projections for marine ecosystems**
 Rose, K, KK Holsman, JA Nye, EH Markowitz, et al.
